

We are looking for talented individuals to join our software development team, working on the development of the products within our suite of digital payment solutions. You will be passionate about developing high-quality software, using the latest technologies, and will be keen to learn and further your knowledge within the industry.

You'll be working in an agile environment where teams around the globe are working together to lead the way in our sector.

We will provide learning opportunities through a combination of on-the-job coaching, self-guided learning, and dedicated training days led by our experts, and would expect the successful candidate to progress rapidly to become a fully self-sufficient developer encompassing a range of highly marketable skills.

What we are looking for:

- A recognised qualification in Computing or Software Development
- Java programming experience, preferably with knowledge of Spring / Spring Boot
- Experience of web technologies (e.g. JavaScript)
- Experience using version control systems e.g. Git
- Knowledge of Agile methodologies, particularly Scrum
- An understanding of SQL/databases
- Familiarity with industry-standard data formats
- A basic understanding of cloud environments (e.g. AWS)

About you:

- You should have a passion for collaboration and teamwork
- You should be a good problem solver and be able to come up with creative solutions to difficult problems
- You should be a strong communicator across all mediums
- Committed to lifelong learning and professional development
- Be capable of delivering desired outcomes under tight deadlines
- Proactive nature, and the ability to work in a fast-paced environment
